

**Submission to Yoorrook Justice Commission****From:** Anonymous**Dated:** 4 December 2022**Submission:**

I have been fighting for years for my children's rights to be able to see myself and my family who are proud Kamilaroi people from northern New South Wales but child protection and VACCA are telling lies and only believes what the mothers say without having any evidence and have stopped me from having any contact with the children I relocated to be apart of my children's life and help them with their education and development and making sure they didn't miss out on knowing where they came from but as the legal system is extremely Prejudice, racist and sexist I am being treated as I am a criminal and judged by what is said to the courts by teenagers who don't have children or any aboriginal heritage.
